

Wraparound boxes – KS 2

Folding instructions

1. The precut pattern of your wraparound folder should be placed on the table with the natural white coloured side facing towards you.
2. Fold all the prefluted edges vertically at a 90 degree angle, once facing upwards and thereafter back again. Set up the side segments of your box right-angled. Bend the double-walled side segments inwards over the edges.
3. Please pay particular attention to the spigot (double-fold) when inserting the re-inforcement into the base of the box. Fold the base of the box over the erected, narrow flaps inwards.
4. Pay particular attention to the flaps, making sure they are not bent in any way.
5. The side flaps as well as the narrow flaps at the front can now be folded inwards at a right angle, hence closing the box.
6. To complete the closing of the wraparound box slide the smaller flap on the top cover side into the base side slit provided.

We have manufactured your product with utmost care and accuracy.

Should you still have difficulties in folding your folder type box, please do not hesitate to contact us. We will gladly assist you.
