

## Clamshell boxes – KS 4

*Folding instructions*

1. The precut pattern of your folder should be placed on the table with the natural white coloured side facing towards you.
2. Fold all the prefluted edges vertically at a 90 degree angle, once facing upwards and thereafter back again. Set up the side segments of your box right-angled.
3. Bend the double-walled side segments inwards over the edges. Please pay particular attention to the spigot (double-fold).
4. Start with the lid of the box. Fold the shorter side segments and set them up, right-angled. Fold the bottom of the lid over the flaps of the side walls, hence snapping into the slits provided.
5. Repeat this procedure when folding the bottom of the box. Between the base of the box and its back you will find a flap with a perforated crease, which is to be bent inwards.
6. Now you may close your box.

*We have manufactured your product with utmost care and accuracy.*

*Should you still have difficulties in folding your box, please do not hesitate to contact us. We will gladly assist you.*
