

## Clamshell boxes – KS 17

### Folding instructions

1. The precut pattern cutting of your box should be placed on the table with the natural white coloured side facing towards you.
2. Fold all the prefluted edges vertically at a 90 degree angle, once facing upwards and thereafter back again. Set up the side segments of your box right-angled.
3. Bend the double-walled side segments inwards over the edges. Please pay particular attention to the spigots (double-folds).
4. Fold the side walls over the flaps in the slits provided. Make sure the flaps engage correctly.
5. Repeat this procedure while folding the base or lid section of your box.
6. Now you may close your box. By doing so, tight movable folds may possibly get stretched and hence become more flexible.

*We have manufactured your product with utmost care and accuracy.*

*Should you still have difficulties in folding your box, please do not hesitate to contact us. We will gladly assist you.*

*Please visit the following site for the animated version of the folding instructions:*
