

## Shelf files - KS 9

Folding instructions

- 1. The precut pattern of your file cutting should be placed on the table with the natural white coloured side facing towards you.
- 2. Fold all the prefluted edges vertically at a 90 degree angle, once facing upwards and thereafter back again. Set up the side segments of your shelf file, right-angled.
- 3. Bend the double-walled side segments inwards over the edges.
- 4. Bend the narrow flap on the side completely inwards. Fold the longer side of the shelf file together. While doing so, put the side segment without a flap between the other segment and its flap.
- 5. Close the bottom by pressing the U-shaped flap first and then both the smaller side flaps into the interior of the file. Now the remaining flap can snap into the emerging slit.
- **6.** In order to level out uneven surfaces at the base of the file, please insert the base reinforcement.

We have manufactured your product with utmost care and accuracy. Should you still have difficulties in folding your box, please do not hesitate to contact us. We will gladly assist you.
