

Archival boxes – KS 13

Folding instructions

1. The precut pattern of your box cutting should be placed on the table with the natural white coloured side facing towards you.
2. Fold all the prefluted edges vertically at a 90 degree angle, once facing upwards and thereafter back again.
3. Set up the side segments of your box right-angled. Bend the double-walled side segments inwards over the edges. Please pay particular attention to the spigots (double-folds) of the side segments and base of the box.
4. Set up the side segment together with the lid right-angled. Fold the shorter side segments over the flaps of the lid segment so that the flaps snap into the slits provided.
5. Now fold the base segment and position both flaps (which are sticking out) between the walls of the side segments of the shorter side.
6. Place the narrow strip into the spine to re-inforce the back side of the box.

We have manufactured your product with utmost care and accuracy.

Should you still have difficulties in folding your box, please do not hesitate to contact us. We will gladly assist you.
