

## Two-piece boxes – KS 8

*Folding instructions*

1. The precut pattern cuttings of your two-piece box should be placed on the table with the natural white coloured side facing towards you.
2. Fold all the prefluted edges vertically at a 90 degree angle, once facing upwards and thereafter back again.
3. Set up the side segments of your box cutting right-angled. Bend the double-walled side segments inwards over the edges.
4. Proceed in the same way with the base and lid parts of the box. Set up the longer side segments right-angled and position the side flaps upright.
5. The next step is to put the side-flaps from the outside into the preslitted side segments located on the longer side of the box. While doing so, the side flaps should engage correctly.
6. When both the base and lid have been set up, you may close the two-piece box.

*We have manufactured your product with utmost care and accuracy.*

*Should you still have difficulties in folding your box, please do not hesitate to contact us. We will gladly assist you.*
