

## Protective Seal Coverings

*For absolute protection of either attached, removed or for hanging seals*

### Specifications:

Seal coverings made of 100 % polyester fleece with an approximate weight of 300gsm and with a thickness of approximately 2.0 mm.

Maximum protection guaranteed, air permeable.

There is no interaction between the seal wax and seal cover material.

### Applicable for seal sizes:

for the following seal diameter sizes 35, 45, 55, 70, 80, and 90 mm

### Scope of application:

A simple and profound method for protecting seals against damage caused by either pushing and pressure implementation, wear and tear, scratches or by dirt and impurities.

### Material characteristics:

Maximum protection guaranteed

No interaction between seal wax and covering material

**Material** 100 % polyester

Needle fleece material, mechanically-bound

Without any further chemical or thermo solidification treatment

Weight of fleece approx. 300 gsm

Thickness 2.0 mm

Bag corner joints are heat-sealed

White in colour

### Remarks:

Practical day-to-day experience in the restoration field enabled the restorers Mrs. Kerstin Forstmeyer and Mr. Johannes Schrepf to develop these seal bags. Their main objective was not only to develop a seal covering for easy handling but the form was also relevant.

Further information, such as our Guarantee of Quality, certificates of independent Testing Institutions and information regarding application methods and instructions are stated on our website [klug-conservation.com](http://klug-conservation.com).
